

## Query, Reporting, and Analytics for IBM i Users

### Replacing DB2 Web Query and Query/400

Has your DB2 Web Query SWMA expired?

Are some staff members still using Query/400 or relying on custom programs to generate reports?

While there are many query and analytics tools with cool features, you've learned that success depends on choosing a vendor committed to technical support and education - a vendor like NGS.

*NGS-IQ* is built for IBM i. It enables business users and over-worked IBM i experts to create and run queries to deliver reports and files to Excel, Web pages, multidimensional models, Adobe PDF, Power BI, and more.

Register to attend our free webinar and see how *NGS-IQ* can affordably help you satisfy a wide-range of business and user requirements.
