

Simplify IBM i Query, Reporting and Analytics

NGS-IQ is an IBM i solution that enables end users, operators, and programmer/analysts to work in the interface and the way they know—without the steep learning curve or complexity you might expect.

Whether you use IBM Query/400, IBM DB2 Web Query, custom programs, or a mix of methods and tools, **NGS-IQ** can cost-effectively help you integrate query and reporting into your workflow. We encourage you to attend this webinar and see how easily you can move forward with **NGS-IQ**.

Who Should Attend:

- IBM Query/400 users who want an easy path to more function
- Companies looking to modernize the reporting built into their custom applications
- Anyone still using IBM DB2 Web Query
